

SUMMARY

Results-driven Salesforce professional with 16+ years of end-to-end CRM delivery experience, including active engagements across Middle East and Central Asian Countries. Specialises in Salesforce Sales Cloud, Service Cloud, Marketing Cloud, and Experience Cloud, with deep expertise in AI-powered platform capabilities including Einstein AI, Agentforce, Einstein Copilot, and Predictive Analytics. Brings a rare combination of technical depth and strategic business acumen across Real Estate, FMCG, Financial Services, Telecom, Automobile, and Public Sector industries in the GCC and Pakistan. Proven ability to lead cross-functional Agile and Scrum teams, manage multi-million-dollar project portfolios, and deliver measurable business impact on time and within budget.

EDUCATION

B.Tech in Computer Science 2016 – 2020

Presidency University | Bangalore, India

EXPERTISE

Requirements & Documentation:

- FRD, BRD, Use Case Documents, Process Flow Diagrams, Workflow Design, Gap Analysis, Stakeholder Interviews

Systems & Platforms:

- e-Governance Systems, ERP Implementation, CRM (Salesforce), Custom Workflow Platforms, Jira, Confluence

Data & Reporting:

- Power BI (DAX, Data Modelling), Advanced Excel, SQL, KPI Dashboards, System Validation

Methodologies:

- Agile, Scrum, SDLC, Functional Testing, UAT Planning & Execution, Change Management, Waterfall

Soft Skills:

- Client Engagement, Stakeholder Management, Cross-functional Communication, Problem Solving, Documentation

PROFESSIONAL EXPERIENCE

Business Analyst — Salesforce CRM & Digital Transformation

Finesse ITLabs Pvt. Ltd | Mumbai, India
Feb 2025 – Present

- Engaged with institutional clients across 4 divisions to gather functional requirements, understand end-to-end business processes, and translate them into structured system workflows for a large-scale CRM implementation
- Prepared comprehensive Functional Requirement Documents (FRDs), Use Case documents, and process flow diagrams covering lead intake, approval routing, assignment logic, and student lifecycle stages
- Designed and documented complex functional workflows including FIFO-based approval and assignment logic, ensuring system validation rules aligned with institutional operational procedures
- Configured and documented API integration workflows (UTM parameter capture via REST API), ensuring alignment between system inputs, validation rules, and reporting outputs
- Produced 10+ FRDs and functional specifications across multiple divisions, translating stakeholder workshops into development-ready documents reviewed and signed off by department heads
- Built Power BI and Excel dashboards for tracking operational KPIs — adopted by leadership for data-driven decision making across divisions
- Planned and executed UAT cycles across 3 stakeholder groups — wrote functional test cases, tracked defects in Jira, and verified system outputs against acceptance criteria before each go-live
- Conducted 15+ client-facing requirement workshops and interviews; identified process gaps and recommended workflow improvements that were incorporated into system design
- Provided implementation support, user training, and post-deployment assistance — prepared role-based documentation and facilitated onboarding sessions across teams

CERTIFICATIONS

- **Career Essentials in Data Analysis** – Microsoft / LinkedIn Learning 2024
- **Excel Basics for Data Analysis** – IBM / Coursera 2024
- **Python Data Structures** – University of Michigan / Coursera 2023
- **Cyber Security Fundamentals** – Azure Skynet Solutions 2023

KEY ACHIEVEMENTS

- Delivered end-to-end digital transformation implementation for a large institutional client spanning 4 divisions – from client requirement workshops to go-live and post-deployment support
- Designed complex functional approval and assignment workflows, reducing 100% of manual routing effort and ensuring system validation rules matched operational procedures
- Produced 10+ FRDs, Use Case documents, and process flow diagrams that passed first-round development review with zero major specification re-works
- Led 4 institutional ERP go-lives with a team of 8, maintaining zero missed major milestones across 4 years and multiple concurrent projects
- Consistently maintained high client satisfaction across complex, multi-stakeholder implementations through structured communication, gap analysis, and proactive issue resolution

Project Lead — ERP Implementation

IMTAC India Pvt. Ltd | Gurugram, India
September 2023 – June 2024

- Led end-to-end ERP implementation projects for 4+ institutional clients, managing full SDLC from client requirement gathering and functional specification through development coordination, UAT, and go-live
- Conducted structured client-facing requirement workshops and process mapping sessions with C-level and department-head stakeholders, interpreting complex institutional workflows and translating them into functional system specifications
- Prepared detailed functional process flow diagrams and Use Case documents for institutional approval and operational workflows, ensuring development teams had precise, unambiguous specifications
- Managed and mentored a team of 8 analysts and implementation consultants across 3 concurrent projects, coordinating between client teams, project managers, and developers throughout delivery
- Reviewed system outputs against functional requirements at each stage, identifying misalignments early and coordinating corrective actions with the development team before UAT
- Coordinated UAT cycles across multiple client sites – maintained quality standards, tracked defects, and secured formal stakeholder sign-off at each milestone
- Identified 10+ process gaps per client engagement and recommended system efficiency improvements, several of which were prioritised and incorporated into final solution design
- Delivered user training, prepared end-user documentation, and provided post-deployment support – achieving high system adoption rates within 30 days of go-live across all client organisations
